Re: Charity Donation for DIPG Research

Dear Staff and pupils,

I wanted to send you a 'Thank you' note and acknowledge receipt of your wonderful £70 donation that has been forwarded to us on behalf of the school via JustGiving. We are so very grateful to your pupils, staff and all who contributed to your fundraising in honour and loving memory of Olivier Roberts.

We were all so saddened to hear of his recent passing, DIPG truly strikes at such a heartbreaking time of life.

Our DIPG research is now such a cumulative effort by so many affected families and my hope is that you feel truly valued to be part of it, please know that you are making a real difference.

We are constantly evaluating the research field for the most innovative studies that will advance the field.

Currently we are focused on funding two brand new clinical trials that will use an immunotherapy known as CAR T-cell therapy, for the first time ever in children with DIPG and DMG (Diffuse Midline Glioma) brain tumours in the UK. The trials are planned to open later this year at Great Ormond Street Hospital.

Our heartfelt thanks again for your help, we are so grateful for the invaluable support.

Best wishes

Amanda Mifsud
(Trustee and Abbie's Parent)
